## Education Access

Hi G Sampath Kumar,

You're all set as a primary admin! As a primary admin, you can now invite eligible students and educators to access Revit.

As an educator with confirmed eligibility for educational access, you can also get other Autodesk® products for your class from the [Autodesk Products page](#) within the Education community. The products you access and assign to students and educators are available until your [Autodesk Education plan expires February 21, 2025](#). You can renew your Education plan annually as long as you are an eligible educator.

Now, when you invite eligible students and educators to use Autodesk products, they don't have to individually confirm their eligibility for educational access. However, if your eligibility expires, so will student and educator access to Autodesk products under your account. So be sure to keep your eligibility current.

To use your primary admin privileges, sign in to Autodesk Account at [manage.autodesk.com](https://manage.autodesk.com).

### Here are some actions you can take to manage student and educator access to Autodesk products:

1. Add student and educators individually or in bulk.
2. Assign students and educators to a product. You have access to 250 Education single-user subscriptions for each product you selected on the Autodesk Products page within the Education community.
3. Remove student and educator access at the end of the school term. This frees up Education single-user subscriptions for your next class.
4. If necessary, assign a secondary admin to help manage student and educator access to Autodesk products.

Users invited to access Autodesk products under your account must be students, faculty, or staff at your educational institution and meet Autodesk education eligibility requirements, including minimum age requirements, to use Autodesk products for educational purposes.

### GO TO AUTODESK ACCOUNT

If your students and educators will be using browser access to Fusion, please share this product URL with them: <https://fusion.online.autodesk.com>. To use the admin installer for shared devices, follow these installation instructions.

**Still have questions? We've got you covered.**

Visit the Autodesk Education plan overview for detailed instructions, or contact support.
