"OLD IS GOLD"

The world is producing millions of tons of plastic for various purposes per day which cannot be recycled further. It includes materials like water packet, tea cups, bottles, food covers etc.

In India plastic was introduced in the year 1957. Plastics are non biodegradable in nature, usually it takes more years in the soil and it contaminates soil water like rivers, lakes etc. So lack of animals and aquatic creatures were losing their life, finally it spreading on beautiful Mother Earth.

Mainly each and every living organism depends upon water for survival. People are using more plastic, even they are storing water in plastic containers which harms our organs and after last 4-5 years, still now we have seen many cows and fishes were sick with drinking of plastic.

In Central the government has laid out a multi-ministerial plan to discourage the use of single use plastic across the country from 2022. Instead of using plastics we can use jute or made of stone and bags or they are good old alternative because it have high strength and long life we are proud to make under by our Prime Minister. But Narendra Modi's government as Himachal Pradesh stood first position to ban plastic shopping bags and latter implemented throughout the country.

In the name of above responsibilities towards our nature-planet and all living creature to stop using single use plastic to save the nature which was in elder days as our grand parents lead their life with happy and healthy without sound of plastic.

Report on Slogan writing

As per the direction from PMO & MoE ID No. 5342841/PMO/2021/SW dated 18.03.2021 from Prime Minister's Office, a competition on writing Slogans was conducted on 3/04/2021 & 4/04/2021 by Environmental club. Around 59 students actively participated in this activity.
