

GEETHANJALI COLLEGE OF ENGINEERING AND TECHNOLOGY
UGC Autonomous
CHEERYAL, KEESARA, Medchal Dist.

Department of Freshman Engineering

Extension Activities

Academic Year 2018-19

1. School Students' visit to College

Students of Thimmayipalli Primary School visited the college to have hands on experience in working with the computers. College provided transport facility to the students.

Mr.Hare Krishna explained the students about the various components of the computers and their functions. The students spent considerable time in the college library.

2. Training Programme on Better Spoken English

The NSS of GCET is a vibrant team working for the development of village youth. One such programme launched by NSS was spoken English classes. These were taken up by Ms P. Mercy Kavitha, Dr K. Madhumathi and Ms G. LathaSuhasini of Freshman Engineering Department. Students of the neighboring villages attended Spoken English Classes for a week from 17th June to 22nd June. They were a heterogeneous group varying in levels of academic education and age group. They were from areas like Cheeryal, Yadgirpally, Bibi Nagar, Bhongir, ECIL, Kushaiguda etc. It is a known fact that Language cannot be imparted in a week but the faculty made a beginning to impart the basics of the language. The classes began on 17 June, 2019 at 9.30 am with 16 students in attendance. The session for the day began after formal pleasantries and an Ice-breaker. Grammar Classes on most important and basic topics like Parts of Speech, Articles and Tenses were covered on a remedial basis during five sessions. This improved their confidence to present their ideas better/ effectively in English. The classes to improve the Reading and Writing Skills were taken up effectively; these helped the students understand the nuances of the skills. The session on Letter Writing proved to be very helpful to the participants. The participants took active part in Speaking Activities like JAM, Situational Dialogues and Listening Comprehension.

Feedback from participants:

1. Almost all participants felt it would be better if more time is allotted for the sessions.
2. They suggested the inclusion of more Speaking Activities in next program.
3. Students expressed that these sessions were very helpful as they could understand the basics. They lauded the faculty's effort.

Feedback from faculty:

1. The team of faculty found them to be keen and focused learners. Teaching such students was a blessing as they were keen in improving their Communication Skills.
2. One major drawback was the participants' punctuality and regularity.
