0 Your destination is the best reward
for safe driving.

10 Introduction: Road safety refers to prevent or
measure road users from being killed or injured.

Some of the road users includes,

- * pedestrians
- * Cyclists
- * Motorists
- * Vehicle passengers.
- * passengers on road traffic ^{Public} transport

Like trains trams etc....

Best Strategy [or] Practises of Road Safety and Security.

The basic strategy of a safe drive approach refers to ensure the event of crash, impact of energies followed less than the threshold, Likely to happen accidents or injuries. This will be vary from Crash Scenario to Crash Scenario depending on the protection provided to the road users involves.

Back ground:

Road Safety traffic is one of most world's largest and prevents injury (or) accidents.

Road Accident is collision between any vehicles for example car, truck, motorcycle or it can be with any pedestrian, animal or the hindrance placed in the middle of the road. The accident occurred could result in many injuries or damage to the property. These are various factors which come into account which can be the reason of accident that is design of the road, driver's impairment and vehical design which can cause serious and most dangerous types of accidents. This essay is based on how road accidents occurs due to the carelessness driving and other factors.

What is the problem which actually occurs?

The provision of highways are resulting inconvenience for the people but the main problem which is faced by the government of any country is that the more frequent road accidents which are happening on the highways which results in severe damage in form of man power or infrastructure and mainly it is happening in big cities like Hyderabad, Banglor, New Delhi and other metropolitan cities where there is huge range of traffic. The problem is basically small which is to be handled very carefully by the government and the traffic police, they have taken many measures to stop these huge accidents.

When a road accident takes place there is various types damages which causes to the various administrations. It is heavy cost to all the damages caused by the accidents and has to paid during accident which increase the implication of everyday there will occur hundreds of accidents across the country which would directly affect the economy.
