AUTONOMOUS

(Accredited by NBA, Approved by AICTE, New Delhi)

Sy.No. 33 & 34, Cheeryal (V), Keesara (M), Medchal District. - 501 301.

30.10.2017

To

The Superintendent Engineer,
Hydel power plant,
TSGENCO,
Nagarjuna Sagar,
Nalgonda.
Respected Sir,

Sub: Permission for Industrial Visit to Nagarjuna Sagar – Reg.

Geethanjali College of Engineering and Technology is one of the most reputed autonomous Engineering Institutions in Hyderabad and known for its excellent record in academics and co-curricular activities. The state of the art facilities and competent faculty provide an excellent climate for the all round development of the students. As a part of the curriculum, the students are deputed for Industrial visits to a few prominent projects of repute. We feel that Industry – Institution-Interaction will provide a good opportunity to learning of practical applications of theory. With the above background, we would like to send students of IV year B.tech – EEE students 50 in number on 31/10/2017 accompanied by Three staff members to visit Hydel power Plant in Nagarjuna sagar, Nalgonda. The coordinator for this program is Mr. M. Pradeep, Assistant Professor in EEE department.

I request you to kindly accord the necessary permission for the above visit and request you to make arrangements for guiding the students during their visit. We assure you that our students will follow the rules and regulations that are prescribed by your organization for the visitors and will in no way disturb the functioning of the organization during their visit. We shall be grateful for a favorable response

Thanking you,

Yours Sincerely,

Dr. Udaya Kumar Susarla,

Dear Madam,

This is with reference to our conversation, we are fine to allow your students to visit our plants on Oct 24th (Tuesday), Oct 25th (Wed) & Oct 26th (Thur).

Your students have to be escorted by your faculties. We expect your team to be in our premises by 10.30am and the invitees are advised to follow the rules of our company.

1. All invitees (students & faculties) have to wear shoes to enter into the production bay.
2. All invitees have to carry ID cards.
3. No food/consumables are allowed to be carried into the premises.
4. Kindly keep the premises clean.
5. Photography is strictly prohibited (Mobiles and other electronic devices are also prohibited).

Contact Person: Mr. S. P. Rao (9848.990.187)

Thanks & Regards

Arun Jyothi

PERMISSION SLIP FOR VEHICLE

Name of Indentor: Manjui Khare Department: EEE

Date: 17/10/17

For use by: Students & faculty member Designation:

Designation: Assistant Prof

Date on which required: 24/10, 25/10, 26/10 From: GCET

Purpose: Industrial Visit

Starting time: 9:30 pm

to: PETE Hammond, PRL Ltd Hyderabad

College / Private Vehicle:

Return time: 4:00 pm

Approximate total KM: 100 km

Type of vehicle: Bus (college bus)

Whether private vehicle required: (if requested college vehicle not available)

Yes / No

Industrial Tour.

We have visited a transformer manufacturing company during the industrial visit. The company was earlier known as 'PETIE transformers' manufacturer but now it is under the control of HPS (Hammond Power Solutions). There we have visited three different plants in which various types of transformers are manufactured. In the first plant we have seen the manufacturing of oil filled transformers, in the second plant we have seen the transformers which are used in solar power plants and in the third plant we have seen the transformers in which the core insulation is made of resin.

The first plant is manufacturing the devices which used in public places and industries. The sizes of the transformers are different based on the requirement of the customer. Firstly we have seen how the winding is prepared and how it is insulated. There are different winding like flat and spiral shaped. In some case only flat winding is used for LV and in other case both HV and LV are made of flat winding. Then we have seen the core. The core, after it is made it is tested by some machines. Then the winding done is inserted into the core and is intown inserted into the transformer tank filled with transformer oil. Then the whole transformer is tested again by applying the voltage to it.

The second plant manufactured the transformer which used by substations and the solar power plants. The transformer of the substations are similar to that of earlier ones but the one used in solar plants are different. Their core is made of consisted of winding made of aluminium sheets. The transformers in this plant are huge and even their models were different. We have also seen an oven there which was used to heat the transformer core if the oil is mixed with water.

The third plant consisted of different windings ~~the~~ and the insulation. In earlier cases the insulation was cardboard material but in this case it was resin. The resins used for insulation were Fiber glass insulation for high voltage and Nomax insulation for low voltage. After the winding is done the winding is put in a mould as is covered fully by pouring a cast epoxy resin in the mould. After it is cooled it forms like a covering to the winding and it looks like a cylinder. In these transformers no oil is filled inside the transformer tank the ~~core~~ is-winding is inserted into the core and it is placed in the tank directly.

Subject:- Permission for Industrial visit on 15/3/18
to Variturn Electro Products (P) Ltd, Hyderabad.

resp Sir,

I, the undersigned request your kind
self to grant permission for industrial visit to
III yr EEE students for VARITURN ELECTRO PRODUCTS (P) LTD,
Cherlapally, Hyderabad on 15/3/18.

This visit will prove to be very useful
to the students in understanding the production
of electrical equipments. Kindly grant us permission &
provide college transport for the same.
Thanking you,

Forwarded to principal
for kind. perusal.

W. Radhika
HOD EEE

PRINCIPAL

Thu, Feb 8, 2018 at 2:08 PM

Resp Sir/Madam,

I, the undersigned request your kind self to grant us permission to visit your industry for III Year EEE Students.(66 NOS).The visit will prove to be very beneficial to the students.

Kindly accept your permission and please let us know about the probable date of visit.

Thanking you

DEPARTMENT OF MECHANICAL ENGINEERING

**A Report on Industrial Visit at
ADVANCED TRAINING INSTITUTE**

On

10th-11th January 2018

For III B.Tech., II Semester Students

Dr. Bura Sreenivas

B.Tech. (JNTUH), M.Tech. (IITD), Ph.D.(IITM), MIE(I)

Professor

Department of Mechanical Engineering

PRINCIPAL

**Geethanjali College of Engg. Tech.
Cheeryal (V), Keesara (M), R.R. Dist. (A.P.) - 501 301**

A visit was carried out at ADVANCED TRAINING INSTITUTE on 10th and 11th January 2018 for III B.Tech., II Semester students of Section-A and Section-B respectively. The main objective behind the visit was to make students aware of the facilities that are available at ATI to undergo various courses offered by them. The courses are primarily designed to impart hands on experience on CNCs, Industrial Automation, Quality control instruments, Autotronics, Mechatronics and Refrigeration and Air-conditioning equipments.

I along with Dr. M.Devaiah made an initial visit to study the facilities of ATI and their relevance to our students on 3rd January 2018. Mr. Vijay Krishna, Asst. Director of ATI took us to all the lab facilities of ATI, where we could physically see all their equipments and the facilities for training students and also interact with their instructors. At the end, we could interact with Mr. S. Suryanarayana, Joint director and Mr. Mihir Parial, Director of ATI, where we could get more input about the possibilities for the students' short term training programmes.

Subsequent to our visit, we have organized a visit for our students on 10-11th January 2018, to get familiarized with the training facility at ATI for our students to develop additional skills, so that they will in turn come up with good design and real time projects and thus become succeed in converting their innovative ideas into reality.

Advanced Training Institute (ATI) is located at Shivam Road, Vidyanagar, Hyderabad which is at a distance of 22 km from Geethanjali College of Engineering and Technology. I along with three faculty members (Mr.B.Subba Rao, Mr.V.Rajashekar, and Mr.P.Satyanarayana) accompanied by 48 students of Section-A on 10th January 2018 and 52 students of Section-B on 11th January 2018 along with two faculty members (Mr. P.Sandeep and Mrs. P.Sreelatha) visited ATI to familiarize students with the infrastructure facilities. We reached ATI at before noon and met Mr. Vijay Krishna. He and another instructor divided the students into two batches along with two faculty members of GCET and then the visit to various labs began.

Students were taken to the following labs:

1. Heat engines laboratory
2. Automobile-Centre of excellence
3. Pneumatics and Hydraulics controls lab
4. CNC Machine Lab
5. CAE, CAM lab

PRINCIPAL
Geethanjali College of Engg. Tech.
Cheeruvu (V), Keasara (M), R.R. Dist. (A.P.) - 501 301

6. Metrology Lab
7. CMM
8. Refrigeration and Air-conditioning lab
9. Industrial automation lab
10. Advanced welding technology lab

In addition, students were given exposure to various labs related to electrical and electronics labs.

Students at CMM

Students at CAE/CAM Lab

Students at Control Technology Lab

Students at COE-Automobile

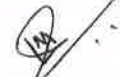

At ATI, Students can undergo various courses which increase their skill and practical knowledge. Students of Mechanical Engineering can undergo training on various courses, which are given in the ATI website: <http://atihyderabad.ap.nic.in>. Courses offered in almost all areas concerned to Mechanical Engineering as per the ATI Training calendar.

PRINCIPAL
Geethanjali College of Engg. Tech.
Cheeryal (V), Keesara (M), R.R. Dist. (A.P.) - 501 301

We concluded the visit with the following understandings based on the feedback both from the faculty and the students

1. One week training per every semester should be made mandatory for all the students followed by the completion of I B.Tech., II Semester.
2. At least one week training for any one course should be facilitated to current II B.Tech., II Semester and III B.Tech., II Semester
3. Two weeks training for every final year students related to their project problem should be made mandatory to result in good mini and major projects.

GCET, Cheeryal
Hyderabad

Sir,

In reference with the email received by this institute on 24th November, 2017, the officials of GCET, Cheeryal, Ranga Reddy Dist, Dr. Bura Sreenivas and Dr. M. Devaiah have visited this institute on 03rd January, 2018. The above officials have been taken to various training sections of the Institute and got familiarised with the available infrastructure.

The above officials have also interacted with Director, Joint Director and concerned faculties to chalk out a plan for sending of their students/staff for various AVTS short term courses at A.T.I. Hyderabad. The Institute training broacher is provided for necessary action at your end.

INDUSTRIAL VISITS FOR THE ACADEMIC YEAR 2017-18

Date: 9/1/2018

CIRCULAR

It is to inform to all the students of III B.Tech., II semester that, an **industrial visit to Advanced Training at Institute (ATI), Vidyannagar** is scheduled as follows

Date	Section
10/1/2018	A
11/1/2018	B

Note: Students should be available in their class room by 9.30 A.M sharp to start the visit.

For further details contact: Dr. B.Sreenivas and Mr. P. Laxmi Reddy

Student Feedback on industrial visit at

ADVANCED TRAINING INSTITUTE

on 10th-11th January 2018 for III B.Tech., II Semester Students

1. How do you find the visit to ATI
 - Relevant to your area of learning
 - Irrelevant
2. Tick the labs you have visited
 - CNC
 - Refrigeration and Air-conditioning
 - CAM/CAE
 - Metrology
 - Industrial Automation
 - Automotive
3. Tick the lab facilities of ATI which helped you to learn beyond the class room
 - CNC
 - Refrigeration and Air-conditioning
 - CAM/CAE
 - Metrology
 - Industrial Automation
 - Automotive
4. Name the courses that you would like to undergo training at ATI

5. Summarize your experience during this visit.

6. Would you like to join us for further industrial visits?
 - Yes
 - No

A
REPORT ON
INDUSTRIAL VISIT
TO
ARCI
BALAPUR, HYDERABAD

16th March, 2018

Students of

III B.Tech., I Semester

Accompanied by

Prof. Dr. Bura Sreenivas & Asst. Prof. P. Laxmireddy

Organized by

DEPARTMENT OF MECHANICAL ENGINEERING
GEETHANJALI COLLEGE OF ENGINEERING

Students of Geethanjali college of Engineering and Technology pursuing IIIrd Year IISemester B.Tech in Mechanical Engineering got an opportunity to visit **International Advanced Research Centre (ARCI)**. The visit was organized with the prior permission and guidance of Hon. Principal Dr. S. Udaya Kumar and Head of Mechanical Engineering Department, Prof. Dr. T Siva Prasad.

Objectives of the Industrial visit are:

- To impart the knowledge about the importance of Nanomaterials.
- To inculcate interest in the young minds to opt research as their career.

Introduction to Company:

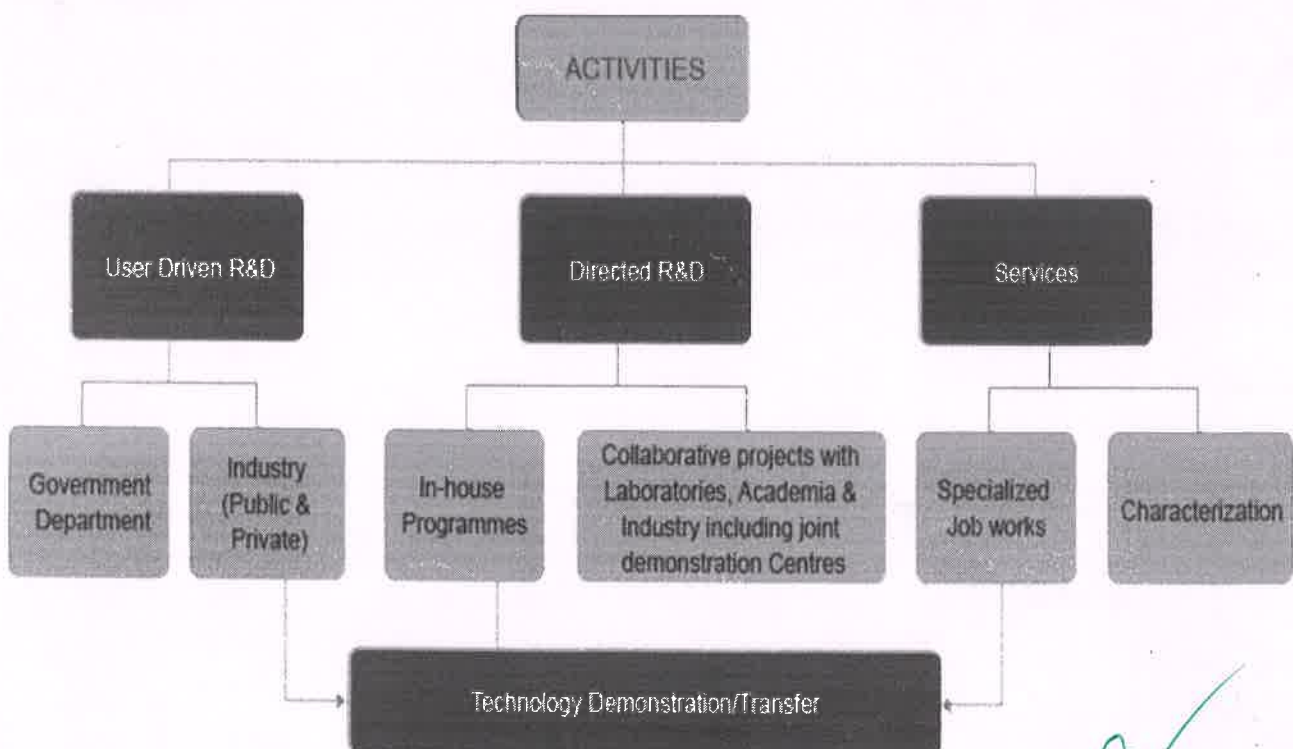

International Advanced Research Centre for Powder Metallurgy and New Materials (ARCI) established in the year 1997 is an Autonomous Research and Development Centre of Department of Science and Technology (DST), Government of India with main campus at Hyderabad spread about 95 acres of land and with operations in Chennai and Gurgaon.

ARCI's mandate is

- Development of High Performance Materials and Processes for Niche Markets
- Demonstration of Technologies at Prototype / pilot scale
- Transfer of Technology to Indian Industry

The activities are pursued through 11 Research Centers, with main focus on development of nationally unique technologies and application oriented programmes. Synonymous to its name, ARCI is also open to collaborate with Indian and foreign laboratories, universities and industries for successful achievement of its goals.

ARCI has successfully transferred 15 technologies to 27 receivers and few other technologies are under transfer.

PRINCIPAL
Geethanjali College of Engg. Tech.
Chennai (V), Keesara (M), R.R. Dist. (A.R.) - 501 301

R&D Centers at ARCI:

- Centre for Automotive Energy Materials (CAEM)
- Centre for Solar Energy Materials (CSEM)
- Centre for Nanomaterials (CNM)
- Centre for Engineered Coatings (CEC)
- Centre for Ceramic Processing (CCP)
- Centre for Laser Processing of Materials (CLPM)
- Centre for Fuel Cell Technology (CFCT)
- Centre for Non-Oxide Ceramics (CNOC)
- Centre for Carbon Materials (CCM)
- Centre for Sol-Gel Coatings (CSOL)
- Centre for Materials Characterization and Testing (CMCT)

Technical support centers at ARCI:

- Technical Information Centre
- Centre for Technology Acquisition, Transfer and International Cooperation (CTATIC)
- Electrical & Civil Maintenance
- Electronics & Instrumentation
- Information Technology Services Centre

What did we do...

We have visited various research centres in ARCI Balapur, Hyderabad under the guidance of scientists available in that particular department. The list of centres visited is

1. Centre for Solar Energy Materials (CSEM) under the guidance of **Dr. V Ganapathy**.
2. Centre for Nanomaterials (CNM) under the guidance of **Dr. R. Vijay**.
3. Centre for Engineered Coatings (CEC) under the guidance of **Dr. N. Ravi**.
4. Centre for Laser Processing of Materials (CLPM) under the guidance of **Mr. K.V. Phani Prabhakar**.
5. Centre for Carbon Materials (CCM) under the guidance of **Dr. P.K.Jain**.

During the visit, there was a technical interaction to strengthen the knowledge about preparation and selection of Nanomaterials for solar energy particles, Nanomaterials, coatings and laser processing materials.

PRINCIPAL

Geethanjali College of Engg. Tech.
Cheeruvu (M), Keesara (M), R.R. Dist. (A.P.) - 501 301

Conclusion:

The visit was very fruitful as it improved our knowledge in development of Nanomaterials for solar energy, engineered coatings, and materials for laser processing. We had very good support and cooperation from all concern instructors available in the ARCI who explained each and every section very interestingly and deeply.

We extend our heartiest thanks to **Mr. Gopal Rao G** officer in the Department of Human Resources for making on 16th March, 2018 day to cherish for our students who are honoured with your humble gesture to get an opportunity to visit few centres of ARCI.

We want to thank to all scientists who have spent their valuable time in spite of their busy schedule. Our special thanks to Dr. V Ganapathy (scientist in the department of CSEM), Dr. R. Vijay (scientist in the department of CNM), Dr. N. Ravi (scientist in the department of CEC), Mr. K.V. Phani Prabhakar (scientist in the department of CLPM), and Dr. P.K.Jain (scientist in the department of CCM).

ARCI, Balapur Hyderabad

On 16th March, 2018 for III B.Tech., I semester students

Objectives of the Industrial visit are:

- To impart the knowledge about the importance of Nanomaterials.
- To inculcate interest in the young minds to opt research as their career.

Questionnaire:

1. Was this your first industrial visit? Yes/No
2. How was your experience at the INDUSTRIAL VISIT?
a. Exceptional b. Very good c. Good d. Average
3. How would you rate your overall experience of the visit on the scale of 1-5? _____
4. Was the industrial visit coordinator co-operative with you? Yes/No
5. Did the industrial visit was as per your expectations? Yes/No
If "No", what expectation of yours we couldn't met, describe in few words
6. Was the industrial visit educational? Yes/No
7. Which part of the trip you disliked, describe in few words?
8. Were you satisfied with the type of service you received in the whole tour of industrial visit?
Yes/No

Dear Sir,

Your visit to ARCI is confirmed on 16.03.2018 (only one batch). The visit will starts from 1000 hrs onward. Further the following may be forwarded for necessary action:

- 01) Maximum 40 (students including faculty) will be allowed.
- 02) List of faculty & students shall be provided.
- 03) Contact number of coordinator.

This is for your information and necessary action.

Further if you have any clarification please feel free to contact.

With regards

Gopal Rao G
Officer - Hr

In this connection kindly send the students and faculty list for further necessary action.

REPORT ON
INDUSTRIAL VISIT
TO
BHEL

RAMACHANDRAPURAM, HYDERABAD

On 30th AUG, 2017

Students of

III B.Tech., I Semester

Accompanied by

Prof. Gangadharam, lab technicians Mr. Mahendra chary & Mr. Mahesh

Organized by

DEPARTMENT OF MECHANICAL ENGINEERING
GEETHANJALI COLLEGE OF ENGINEERING

The department has arranged an industrial visit to BHEL, Ramachandrapuram, Hyderabad for IIIrd Year I semester students of Mechanical Engineering department. The visit was organized with the prior permission and guidance of Hon. Principal Dr. S. Udaya Kumar and Head of Mechanical Engineering Department, Prof. Dr. T Siva Prasad.

Objectives of the Industrial visit are:

- To learn about the Design and Assembling of Steam Turbine.
- To learn about the manufacturing process of steam turbine blade on 5-Axis CNC.
- To learn about the Design and Manufacturing of Heat Exchanger.

World of BHEL

Pan India

- 17 Manufacturing Unit
- 1 Subsidiary
- 6 Joint Ventures
- 8 Service Centre
- 2 repair units
- Infrastructure to deal with 150+ project sites

Global Footprints

- First export order for boilers (2x60 MW) from Malaysia, 1971
- Commissioned first 120MW BTG & sub-station unit on turkey basis at Tripoli, Libya in 1980
- References in 76 countries
- Offices in 8 countries
- Contracted power plant equipment around 17,000 MW
- Executing 28 projects spread over 20 countries

The Gentle Giant

- An Indian Maharatna CPSE
- One of the largest engineering & manufacturing companies in India serving core sectors of economy- Power
- Industry
- Transmission / Transportation/ Oil & Gas / Renewables/Water/ Defence/Industrial products – Electrical & Mechanical
- One of the few Major Integrated Power Plant Equipment Manufacturers
- Power plant Equipment
- Manufacturing capacity of 20,000 MW p.a
- 57% share in India's total installed power generation capacity

INTRODUCTION

Heavy Power Equipment Plant (HPEP), Hyderabad is one of the major manufacturing units of BHEL. It was established in 1965 with the objective to design, manufacture and supply small size (12MW to 110 MW) steam turbine generator sets. With a modest beginning, BHEL Hyderabad has been growing steadily and today it caters to diversified customer needs with a product mix of gas turbines, steam turbines, compressors, generators, oil field equipment and other power plant equipment such as pumps, pulverizers and heat exchangers etc.

In the power segment, BHEL Hyderabad offers stand-alone products & packages as well as EPC & turnkey solutions from concept to commissioning including civil works, equipment design, erection, commissioning, trial operation and handing over to customer. BHEL Hyderabad provides the flexibility of plant erection & commissioning by customer with BHEL supervision.

Coal based thermal power plant in India

In the year 2011-12, a separate unit 'Project Engineering & Systems Division' (PE&SD) was formed at Hyderabad with the mandate to provide end-to-end solutions to customers in industrial and international business segments. To effectively address customer needs, PE&SD caters to supply of balance of plant equipment and system engineering for the inhouse products of BHEL Hyderabad.

BHEL Hyderabad supports customers with post-warranty services including supply of spares and extends commissioning and after-sales support.

BHEL always strives to exceed customer expectations and has sophisticated engineering capabilities, manufacturing, testing facilities with a network of high-end engineering work-stations to cater to the specific needs of the products.

BHEL Hyderabad customer profile is a virtual who's-who of the Indian industry with all sectors catered to by BHEL. We have also forayed into the export market by supply of products and equipment from BHEL Hyderabad for power stations and process industry.

CNC machines at BHEL, Hyderabad

Manufacturing facilities at BHEL Hyderabad are on par with the best in the world with 120 CNC machining centers, 125 ton vacuum balancing tunnel, Cerro-bond technology for steam turbine precision blade forgings, 5 axis milling for 3D impellers etc. BHEL Hyderabad has also established CIM (Computer Integrated Machining).

3000 networked PCs provide enhanced operational efficiency. ERP/SAP systems have been implemented to smoothen the information flow and effective management of business processes. BHEL Hyderabad has a host of instrumentation laboratories and sophisticated quality control facilities. BHEL is equipped with ISO 9001, ISO 14001, OHSAS 18001, ASME U & U2 stamp and API certification for oil rigs which is a testimony of sound and consistent quality and safety practices at BHEL. Customer training is provided for all products to customers in order to have safe and maintenance free operation of products at site.

BHEL is qualified by Fluor-USA, CB&I-USA and Saipem-Italy for supply of critical process equipment to refineries and power plants.

What did we do...

We have visited the plant on 30th August, 2017 at various sections like foundry to learn the techniques used in castings, 5-Axis CNC machine to learn the manufacturing process of steam turbine blades, assembly section of steam turbine and the design and manufacturing sections of Heat Exchangers.

At the end of plant visit, there was a technical interaction to strengthen the knowledge regarding production methodologies and heat treatment processes with Production manager Shri. CH. Madhan Mohan.

Conclusion:

The visit was very fruitful as it improved our knowledge in foundry section, designing and manufacturing of various complicated components and their assembling. We had very good support and cooperation from all concern instructors available in the industry who explained each and every section very interestingly and deeply.

We extend our heartiest thanks to **Mr. Sainadhan** officer in the Department of Human Resources for making on 30th August, 2017 day to cherish for our students who are honoured with your humble gesture to get an opportunity to visit few sections of BHEL.

We want to thank to Deputy General Manager Mr. K. Vijaya Kumar Gaaru, and Sr. General Manager Mr. Venkateswara Rao Gaaru for guiding and sharing information about organization profile, Design and manufacturing process and assembling at BHEL, Ramachandrapuram, Hyderabad.

DEPARTMENT OF MECHANICAL ENGINEERING

Student feedback on industrial visit at

BHEL, Ramachandrapuram, Hyderabad

On 30th August, 2017 for III B.Tech., I semester students

Objectives of the Industrial visit are:

- To learn about the Design and Assembling of Steam Turbine.
- To learn about the manufacturing process of steam turbine blade on 5-Axis CNC.
- To learn about the Design and Manufacturing of Heat Exchanger.

Questionnaire:

1. Was this your first industrial visit? Yes/No
2. How was your experience at the INDUSTRIAL VISIT?
a. Exceptional b. Very good c. Good d. Average
3. How would you rate your overall experience of the visit on the scale of 1-5? _____
4. Was the industrial visit coordinator co-operative with you? Yes/No
5. Did the industrial visit was as per your expectations? Yes/No
If "No", what expectation of yours we couldn't met, describe in few words
6. Was the industrial visit educational? Yes/No
7. Which part of the trip you disliked, describe in few words?
8. Were you satisfied with the type of service you received in the whole tour of industrial visit?
Yes/No

Dear Sir,

Sub: Permission for Industrial Visit – Reg.

Geethanjali College of Engineering and Technology is one of the most reputed Engineering Institutions in Hyderabad and known for its excellent record in academics and co-curricular activities. The state of the art facilities and competent faculty provide an excellent climate for the all round development of the students.

As a part of the curriculum, the students are deputed for Industrial Visits to a few industries of repute. We feel that Industrial – Institute-Interaction will provide good opportunity to learning of practical applications of theory.

With the above background, we would like to send a batch of about 120 students of B.Tech - ME branch of accompanied by two staff members to visit your esteemed organization. The coordinator for this program is Mr.S.V.Gangadharam – Professor in ME Department.

I request you, to kindly accord the necessary permission for the above visit and request you to make arrangements for guiding the students.

We assure you that our students will observe the rules and regulations that are prescribed by your company for the visitors and will in no way disturb the functioning of the company during their visit.

We shall be grateful for a favorable response.

Thanking you,

Yours Sincerely,

Sir / Madam,

This is with reference to your request, regarding Industrial Visit for your students.
The date is confirmed for 30-08-2017 at 09:00 Hrs.

- You are, requested to send us a confirmed list of the students
- You may report for the visit by 09:00 Hrs.
- The students and the staff have to wear shoes and bring their college ID without, fail. Those students without ID Cards are not be allowed for the visit. (Please inform students and accompanying staff accordingly)
- Cell Phones, cameras, Laptops, pen-drives and any other electrical gadgets and bags Are not, allowed inside. Students have to make their own arrangements for their safe Keeping.
- On arrival, you may contact, A. Sainadhan,

Phone No. 040-23184755 or 09985475716

Regards
Sainadhan

Respected Sir,

Subject: Permission for Industrial Visit – Regarding

An industrial visit is planned on 22nd Sep 2017 for II B.Tech (ECE) students to M/s Datalog Controls and Solutions Pvt. Ltd., and M/s Variturn Electro Products(P) Ltd., Both of these are located in the same premises in Cherlapally and are specialized in manufacturing and supply of Wire Wound Resistors, Power Rheostat, battery management systems and Load Banks for Industrial and Defense applications.

Two batches of around 60 students each of II B.Tech(ECE) are planned in the FN and AN sessions.

I request you to kindly accord the necessary permission for the above visit. I also request you to provide necessary transport for the above visit.

Thanking you,

Yours faithfully,

Report on Industrial Visit to Datalog Controls and Solutions

Datalog Controls and Solutions was established in the year 1998 with the objective of developing test and control systems indigenously and provide the industry with excellent data logging solutions. Datalog controls has been steadily progressing in achieving its objective of developing import substitute system for the industry. Encouraged by the industry, datalog has successfully designed, developed and commissioned some highly complex and technically challenging systems meeting the stringent quality requirements of the defense laboratories. Datalog has pioneered the design and development of computerized test systems such as thermal battery test systems high voltage, high current, fast acting electronic load banks, battery life cycle test systems, automated test systems for testing the power supplies etc. Datalog is specialized in understanding the specific requirement of the end users and designing the systems with user friendly application software. Typical applications of our products include research & development, incoming inspection, production testing, quality control and quality assurance. Each year we invest a large percentage of our revenue in research and development to enable us remain a professional producer of quality test systems to meet the highly increasing quality requirements of our customers. Datalog has passed the most extensive assessment possible, ISO 9001:2008, which includes engineering and design in the qualification process. This assures our customers will have highest level of quality possible. In a nutshell, Datalog is capable of designing & developing variety of custom built systems ranging from a microcontroller based hand held systems to highly complex missile battery test systems with their excellent quality, service and support.

Based on above industry profile, Department of ECE, Geethanjali College of Engineering & Technology management arranged an industrial visit to Datalog Controls and Solutions, Hyderabad for **B.Tech ECE II yr I Sem A-Section students on 22nd Sep 2017** in order to get practical knowledge on design and development of computerized test systems such as thermal

battery test systems high voltage, high current, fast acting electronic load banks, battery life cycle test systems, automated test systems for testing the power supplies etc.

Approximately 52 students visited the industry and gained the practical knowledge.

Many students actively interacted with industry experts and sought clarifications to their questions.

Along with students, 2 faculty members accompanied the students and upgraded their knowhow.

In above photographs, students were observing the manufacturing of load resistors and other components.

7th February, 2018.

To
The Principal
Geethanjali College of Engineering and Technology,
Cheeryal.

Respected Sir,

Sub: Seeking Permission for Industrial Visit – Regarding.

To facilitate practical exposure to our II B.Tech(ECE) students, we are planning to arrange an industrial visit to M/s Datalog Controls and Solutions, Cherlapally, Hyderabad on 8th Feb and 10th Feb 2018. Please note that II B.Tech(ECE) "A" and "D" sections already visited this industry earlier.

Plan for Industrial Visit of II B.Tech (ECE) Students

	DATE	TIME	CLASS	FACULTY
1.	8 th FEBRUARY, 2018 (THURSDAY)	9:45 AM – 12:30 PM	II B.Tech (ECE) Section B	Mr. M. Krishna Ms. Suneetha
2.	10 th FEBRUARY, 2018 (SATURDAY)	9:45 AM – 12:30 PM	II B.Tech (ECE) Section C	Mr. Chandra Prakash Reddy Ms. A. Sowjanya
3.	10 th FEBRUARY, 2018 (SATURDAY)	12:30 PM – 03:30 PM	II B.Tech (ECE) Section E	Ms. Sony Mr. Sandeep

I request you to kindly grant permission for the industrial visit and arrange transport.

Thanking you sir,

Siva Kumar
Yours sincerely,
OVPR. Siva Kumar,
Professor, Dept. of ECE

Report on Industrial Visit to Datalog Controls and Solutions

Datalog Controls and Solutions was established in the year 1998 with the objective of developing test and control systems indigenously and provide the industry with excellent data logging solutions. Datalog controls has been steadily progressing in achieving its objective of developing import substitute system for the industry. Encouraged by the industry, datalog has successfully designed, developed and commissioned some highly complex and technically challenging systems meeting the stringent quality requirements of the defense laboratories. Datalog has pioneered the design and development of computerized test systems such as thermal battery test systems high voltage, high current, fast acting electronic load banks, battery life cycle test systems, automated test systems for testing the power supplies etc. Datalog is specialized in understanding the specific requirement of the end users and designing the systems with user friendly application software. Typical applications of our products include research & development, incoming inspection, production testing, quality control and quality assurance. Each year we invest a large percentage of our revenue in research and development to enable us remain a professional producer of quality test systems to meet the highly increasing quality requirements of our customers. Datalog has passed the most extensive assessment possible, ISO 9001:2008, which includes engineering and design in the qualification process. This assures our customers will have highest level of quality possible. In a nutshell, Datalog is capable of designing & developing variety of custom built systems ranging from a microcontroller based hand held systems to highly complex missile battery test systems with their excellent quality, service and support.

Based on above industry profile, Department of ECE, Geethanjali College of Engineering & Technology management arranged an industrial visit to Datalog Controls and Solutions, Hyderabad for **B.Tech ECE II yr II Sem B-Section students on 8th Feb 2018** in order to get practical knowledge on design and development of computerized test systems such as thermal

battery test systems high voltage, high current, fast acting electronic load banks, battery life cycle test systems, automated test systems for testing the power supplies etc.

Approximately 56 students visited the industry and gained the practical knowledge.

Many students actively interacted with industry experts and sought clarifications to their questions.

Along with students, 2 faculty members accompanied the students and upgraded their knowhow

In above photographs, students were observing the manufacturing of load resistors and other components.

24th February, 2018.

To
The Principal
Geethanjali College of Engineering and Technology,
Cheeryal.

Respected Sir,

Sub: Seeking Permission for Industrial Visit – Regarding.

To facilitate practical exposure to our III B.Tech(ECE) students, we are planning to arrange an industrial visit to **National Institute of Amateur Radio**, Somajiguda, Hyderabad as per the following schedule:

Plan for Industrial Visit of III B.Tech (ECE) Students

DATE	DAY	SECTION	NUMBER OF STUDENTS	TIME	ACCOMPANYING FACULTY
27.2.2018	TUESDAY	III B.TECH (ECE) "D"	60	11AM TO 1PM	Ms. Krishna Priya Mr. RVNR. Suneel Krishna
27.2.2018	TUESDAY	III B.TECH (ECE) "A"	60	2PM TO 4PM	Mr. Venkatrami Reddy Ms. Jyothirmayee
28.2.2018	WEDNESDAY	III B.TECH (ECE) "B"	60	11AM TO 1PM	Ms. B. Mamatha Ms. B. Ramu

Report on Industrial Visit to National Institute of Amateur Radio

National Institute of Amateur Radio (NIAR) is a Non Government Organisation (NGO) founded by Mr.S.Suri, VU2MY at Hyderabad. It was registered as a Public Society on 21st June 1983. Encouraged by the Govt. of India, several State Governments and World Bank etc. NIAR is established to spread the awareness of Amateur Radio activity amongst the people in India

Amateur Radio is a scientific activity popularly known as "Ham Radio". Amateur radio operators use two way radio stations and communicate with others similarly authorized using various modes of communication like voice, morse code, computers, internet etc. The things that amateur radio operators do with their radios are as diverse as the people themselves. The advanced amateur radio communication techniques include Automatic Position Reporting Systems using GPS information, Internet linking of Repeater stations, Interface with internet for exchange of emails, images etc as well as visual communication modes.

Amateur (HAM) Radio is both a Hobby activity and Service. It is an activity of self learning, inter-communication & technical investigation carried on the duly authorized persons (i.e. Amateur Radio Operators) for a personal aim and without pecuniary interest. There are over 30 lakh people all over the world who pursue this activity in their free time, in India we have around 15000 amateur radio operators.

Any individual above the age of 12 can become an Amateur Radio operator-no matter what age, gender or physical ability. Amateur Radio Operators have to qualify in an examination conducted by Ministry of Communications & IT, Government of India and obtain license for operating / possessing a Radio Station.

A wireless communication network through Amateur Radio is one of the most effective and alternate medium of communication and can play a significant role in providing reliable communications when other normal communications fail. The skills of the trained amateur radio operator can be used for public service in times of need and emergencies. In numerous occasions, under extreme circumstances, very efficient amateur radio communication and humanitarian assistance was provided by Hams particularly during Uttarkhand Floods 2012, Aila cyclone-2009, Krishna floods-2009, Indian Ocean Tunami-2004, Gujarat Earthquake-2001, Orissa Super Cyclone-1999 and many other natural / man-made calamities in the country.

Based on above industry profile, Department of ECE, Geethanjali College of Engineering & Technology management arranged an industrial visit to National Institute of Amateur Radio

PRINCIPAL

Cheeryal (V), Keesara (M), Medchal Dist.(T.S.)-501 301.

(NIAR) , Hyderabad for **B.Tech ECE III Year-II Sem, D-Sec students on 27th Feb 2018** in order to get practical knowledge on working of Amateur Radio.

Approximately 53 students visited the industry and gained the practical knowledge.

Many students actively interacted with industry experts and sought clarifications to their questions.

Along with students,02 faculty members accompanied the students and upgraded their knowhow.

Report on Industrial Visit to National Institute of Amateur Radio

National Institute of Amateur Radio (NIAR) is a Non Government Organisation (NGO) founded by Mr.S.Suri, VU2MY at Hyderabad. It was registered as a Public Society on 21st June 1983. Encouraged by the Govt. of India, several State Governments and World Bank etc. NIAR is established to spread the awareness of Amateur Radio activity amongst the people in India

Amateur Radio is a scientific activity popularly known as "Ham Radio". Amateur radio operators use two way radio stations and communicate with others similarly authorized using various modes of communication like voice, morse code, computers, internet etc. The things that amateur radio operators do with their radios are as diverse as the people themselves. The advanced amateur radio communication techniques include Automatic Position Reporting Systems using GPS information, Internet linking of Repeater stations, Interface with internet for exchange of emails, images etc as well as visual communication modes.

Amateur (HAM) Radio is both a Hobby activity and Service. It is an activity of self learning, inter-communication & technical investigation carried on the duly authorized persons (i.e. Amateur Radio Operators) for a personal aim and without pecuniary interest. There are over 30 lakh people all over the world who pursue this activity in their free time, in India we have around 15000 amateur radio operators.

Any individual above the age of 12 can become an Amateur Radio operator-no matter what age, gender or physical ability. Amateur Radio Operators have to qualify in an examination conducted by Ministry of Communications & IT, Government of India and obtain license for operating / possessing a Radio Station.

A wireless communication network through Amateur Radio is one of the most effective and alternate medium of communication and can play a significant role in providing reliable communications when other normal communications fail. The skills of the trained amateur radio operator can be used for public service in times of need and emergencies. In numerous occasions, under extreme circumstances, very efficient amateur radio communication and humanitarian assistance was provided by Hams particularly during Uttarkhand Floods 2012, Aila

cyclone-2009, Krishna floods-2009, Indian Ocean Tunami-2004, Gujarat Earthquake-2001, Orissa Super Cyclone-1999 and many other natural / man-made calamities in the country.

Based on above industry profile, Department of ECE, Geethanjali College of Engineering & Technology management arranged an industrial visit to National Institute of Amateur Radio (NIAR), Hyderabad for **B.Tech ECE III Year-II Sem, B-Sec students on 28th Feb 2018** in order to get practical knowledge on working of Amateur Radio.

Approximately 48 students visited the industry and gained the practical knowledge.

Many students actively interacted with industry experts and sought clarifications to their questions.

Along with students, 02 faculty members accompanied the students and upgraded their knowhow

In the above photograph students are listening to lecture by experts of NIAR

Respected Sir,

ICOMM Tele Limited (www.icommtele.com) is primarily an Engineering, Procurement and Construction (EPC) company provides comprehensive infrastructure solutions in the Power, Defence, Telecom and Water sectors.

ICOMM distinguishes itself by having the best in class manufacturing facilities and a dedicated Defence Communications & Shelters R&D Section committed to providing contemporary innovative solutions to the customers.

The Power Transmission (upto 1200kV) & Telecom towers (3G/4G) facility is one of the largest at Global Level with a capacity to manufacture 250,000 MT per year.

We are glad to inform you that IV B.Tech (ECE) students of your college accompanied by faculty Prof. O.V.P.R. Siva Kumar, Ms. T. N. Swetha and Mr. R.V.N.R Suneel Krishna have visited our company on 7th April, 2018 to get familiarized about design and manufacturing of Communication Systems in our Defence division.

We hope this is useful to your students to get practical exposure.

Thanking you,

Yours Sincerely,
For ICOMM Tele Limited.

Report on Industrial Visit to ICOMM Tele Limited

Company Overview

ICOMM Tele Limited., a pioneer and leader, is one of the India's largest product designing, engineering development and turnkey solution providers for the Telecom, Defense, Solar, Power and Infrastructure Sector.

Incorporated in 1989, ICOMM now rules India within its business domain along with its presence in the Africa, Asia and the Middle East. The company is having State-of-the-art Telecom wireless & wire line equipment manufacturing Unit & Technology Center, Conductors, Transformers, Solar Manufacturing & a world's largest capacity of tower manufacturing facility of 250,000MT per annum with backward integrated fully equipped Galvanizing, Steel Rolling & fastener's manufacturing to meet the market demands of Power, Telecom, Infrastructure and Solar Sectors.

Major ICOMM Skills:

- Shelters manufacturing Unit – Telecom, Power & Defense
- Solar Manufacturing Unit
- Telecom Wireless & Wire-line Manufacturing Unit and Technology Centre
- Conductors / Transformers / Distribution Line material / Insulators Manufacturing Unit.
- Towers Galvanizing Manufacturing Unit – GSM & CDMA Telecom, Power Transmission Towers & Broadcasting, Windmill & Military Towers

ICOMM gained experience and expertise in handling various major projects coupled with technology, innovation, quality made to acquire most needed strengths for delivering the best work for utmost satisfaction of the customers.

ICOMM's core strengths are :

- Technology Expertise
- Turnkey Services expertise
- Complete Understanding of Telecom and Defense Requirements
- Strategic Alliances
- Quality Standards
- Manufacturing Infrastructure
- Design and Test Equipment Facilities
- Customer Relationships & After Sales Support
- Excellent Infrastructure - Largest Capacity in the world backed by backward integration with galvanizing facilities
- Excellent Human Resources

ICOMM has made an indelible mark in market and keep constantly and consistently re-engineering itself to retain its position of leadership in the areas of quality, technology, capacity and capability.

Respected Sir,

Subject: Permission for Industrial Visit – Regarding

An industrial visit is planned for **IV B.Tech (ECE)** students to equip them with practical knowhow in Wireless and Wired Telecommunication Switching Technology. Towards this purpose, we contacted **Regional Telecom Training Centre (RTTC), BSNL**, Gachibowli, Hyderabad and received confirmation for a one day visit. A copy of the approval and detailed agenda is attached to this letter.

A batch of around 120 students of IV B.Tech(ECE) (actual number is subject to students' registration) accompanied by four faculty members is planned to visit the above mentioned facility of BSNL on **23rd September 2017**.

I request you to kindly accord the necessary permission for the above visit. I also request you to provide necessary transport for the above visit.

Thanking you,

Yours faithfully,

O.V.P.R. Siva Kumar

O.V.P.R. Siva Kumar
Professor, Dept. of ECE
Coordinator, Industrial Visits

Submitted to the Principal

In principle, permission may be given to select interested students for the Industrial visit as RTTC has a limitation that they cannot accommodate more than 100 in a batch.

Separate consent & Approvals will be sought on specifics of the needed arrangements in due course.

To: sree lakshmi <gantisiriphd@gmail.com>

With reference to your mail, the students are permitted for industrial visit.

The visit may be planned on 23-09-2017. The timings of visit are strictly between 10.15 AM to 1.15 PM and we cannot extend the timings there after.

1. During the visit various Telecom Labs/ Equipment will be demonstrated to the students.

2. The charges for industrial visits are as follows

Rs. 200/- + GST @ 18% (i.e Rs.36/-) per person per visit.

Note: A discount of 10% on Fee for a group having 26 to 50 persons
A discount of 20% on Fee for a group having 51 & above persons
(GST - will be charged @18% on Total Fee)

3. Please send the soft copy of the students list along with Roll No and Date of Birth, contact number as per the proforma file enclosed on or before 20-09-2017.

(Maximum Faculty allowed: for every 40 students - 1 faculty member)

Please send the confirmation mail by **16-09-2017 afternoon**. Also share the contact number please for any queries, please speak to the under signed or reply back to this email.

Feedback from Faculty on Industrial Visit

(Use additional paper if space provided is insufficient)

Name of the faculty: Dr.V. Satya Srinivas and Ms.Sree Lakshmi

Date of Industrial Visit: 23rd September 2017

Name of the company visited: **Regional Telecom Training Center,
Bharat Sanchar Nigam Limited (BSNL), Gachibowli, Hyderabad.**

Total number of students attended: **38 B.Tech ECE IVth Year students from Section: A, B and C**

1. What are the core products / functions of the company?
BSNL is a service –centric organization. The core products are land line services, Broad band services, Leased lines, VPNs and wireless cellular services. The main function of the company is to provide telecommunication for the entire country including the rural and remote areas.
2. What are the different methods used for the product design / development / manufacturing?
This is a service based organization not a product design / development / manufacturing unit. The telecom services are facilitated by deploying routers, electronic switches, optical fibre cable, Base station units, antennas and servers. These products are from various manufactures including Cisco, C-DOT, Tejas equipment, Siemens, Motorola, ZTE, Nortel, Mobi Antennas etc.
3. Describe how this trip has been useful to students.
The students understood actual process involved in transfer of voice and data from one end to another end through various entities and the underlying technologies.
4. How did students interact with representatives of the company during industrial visit and what sort of questions were raised by them?
Students are enthusiastic and trying to correlate the theory and understanding the way how telecommunication infrastructure is established to facilitate quality of services.
 - a) How the switching network supports if the subscribers are increasing.
 - b) Which modulation techniques are used to increase the speed of the data.
 - c) What is the call setup time.
 - d) How to join the OFC cables and fault detection.
 - e) How the voice and data are differentiated over land line for voice and broadband services.
 - f) What type of antenna is used at the base station tower.
 - g) How many cells (frequency reuse pattern) are considered as cluster in general.
 - h) What will be the Radiation effects from Cell Towers? What's the LOS distance to be maintained from cell tower?
5. List down key take away points / overall learning from the trip (minimum three points)

1. C-DOT switching lab: (RTTC staff: Mr.T. Krishna Reddy): Exchange setup is demonstrated and explained
 - a. ANRAX exchange for rural areas, that supports 256 users.
 - b. Pulse Code Modulation (PCM) is used for speech processing for landline.
 - c. Speed of the data rate (64Kbps) on landline connection
 - d. 2048 connections for one Base module.
 - e. $E1=32 \text{ channels} \times 64\text{kbps} = 2\text{Mbps}$.
2. GSM/CDMA Lab: (RTTC staff: Mr.P Naresh): Concepts are explained in a class room. Base station unit and dipole antenna (which will be used at cell towers) are demonstrated.
 - a. The evolution of generations of mobile phones (1G, 2G, 2.5G, 2.75G, 3G, 3.9G and 4G, wifi, wimax).
1G (Analog), 2G(Digital, European standard, 890-960MHz), 2.5G (GPRS, G), 2.75G(Edge, E), 3G (UMTS/CDM2000; H/H+), 3.99G (HSDPA, H+), 4G (LTE) 890-960 MHz (2G, 125 carriers, 1 carrier gaud band, Each carrier 200KHz), 1710-2170 (2G+3G, at 2170 MHz Centre frequency 5MHz B.W used for 3G).
 - b. Base station unit at the cell tower supports three antenna connections.
 - c. Each antenna covers 65° area of the cellsite, so $3 \times 65 = 195^\circ$ out of 360° . The area not covered in the cell site by the host antennas will be covered by surrounded cell site antennas.
 - d. The voice calls are supported at 13.1kbps. Half rate (6.5Kbs), Quarter rate (3.6 Kbs) to support more subscribers. This reduces the quality of the call.
 - e. Call setup time for same network is less than $<10\text{sec}$.
 - f. Call setup time between two different networks is less than $<20\text{sec}$.
 - g. RF planning tools are used for a startup system to check the signal coverage.
 - h. The actual Carrier/Interference ratio in real time that can be achieved is 12dB (theoretical assumption i.e. 18dB).
3. OFC lab: (RTTC staff: Mr.P Lokesh Kumar)
 - a. OFC cables are shown, allowed to physically handle the cable and clarified core/cladding through cable connector instrument (slicing machine, Toshiba Company). Identification: Blue color: cladding ; Black color: Core.
 - b. The maximum length of OFC cable is 2Km.
 - c. OFC cables are joined at each 2Km point to extend connection for long distance.
 - d. Optical Fibre Cable is laid through PLB Pipes buried at a nominal depth of 5 feet.
 - e. Single mode and multimode OFC cables are demonstrated.
 - f. Students are given the opportunity/hands-on to join the optical fibre through slicing instrument (Japan).
 - g. In case OFC cables got cut, the fault is identified using the Optical Time domain Reflector (OTDR) instrument (radar principle).
4. Broadband lab: (Mr.V Ramesh Kumar)
 - a. BSNL is the biggest internet provider in India, only ISP that is available in every corner of the country.
 - b. Demonstrated Interconnection between switches and various routers.
 - c. National Internet Broad band back bone (Tier 1, Tier 2 and Tier 3 switches).
 - d. Five Tier 1 switches all over the country (Bombay, Delhi, Chennai, Kolkata and Hyderabad).

6. Do you recommend this visit to next year batch? (Yes/No and explain why)
Yes. The students of ECE branch in particular though have an idea of technologies in use/supported by the telecom sector, the trip to RTTC will give an exposure on how and what are the different entities deployed to support various services and also the various sections of the departments and work flow.
7. What are your suggestions for any future industrial visits?
RTTC training staff has given the adequate information for the sessions/time allotted. The RTTC has another (full-day) package in which more coverage on topics mentioned above will be done. This will benefit the students to gather more details.

INDUSTRIAL VISIT

RTTC, Hyderabad is an ISO 9001:2008 certified prestigious Telecom Training Centre in Southern Region and its campus at Gachibowli spread in about 40 acres of land is equipped with modern infrastructure to impart training at global standards in a most conducive environment, having many laboratories containing not only latest telecom switching, transmission equipments, GSM equipment and computer & networking laboratories, but also has a facility to extend training on live systems wherever the training needs demand.

The RTTC permits the engineering students to have an industrial visit to the latest Telecom equipment available across the globe.

During the visit the following Lab/ Equipment will be demonstrated to the students.

- Electronic switch (CDOT)
- Mobile / GSM & WiMax BTS
- Optical fibre cable, SDH, DWDM systems
- Broadband & IPv4/ IPv6 Networking equipment.

The college Administration can send the request mail to bdrttc@bsnl.co.in for arranging a visit on any working day with 1 week advanced intimation.

Rates:

GST of 18%

₹. 200/- + Service Tax & Swaehh Bharat Cess@ 14.5% per student

Note:

- A discount of 10% on Fee for a group having 26 to 50 students
- A discount of 20% on Fee for a group having 51 & above students
